#### 码拉松

### Number of Swift源码简介

- Swift于2015年正式开源, github地址: <a href="https://github.com/apple/swift">https://github.com/apple/swift</a>
- ■几个可能会经常看的目录
- □ docs:一些文档
- □ stdlib: Swift源码
- □ lib: C++源码
- □ include: C++头文件
- ■标准库源码位置
- □ <a href="https://github.com/apple/swift/tree/master/stdlib/public/core">https://github.com/apple/swift/tree/master/stdlib/public/core</a>

- map、filter
- □ <a href="https://github.com/apple/swift/blob/master/stdlib/public/core/Sequence.swift">https://github.com/apple/swift/blob/master/stdlib/public/core/Sequence.swift</a>
- flatMap、compactMap、reduce
- □ https://github.com/apple/swift/blob/master/stdlib/public/core/SequenceAlgorithms.swift

# Mygan Substring分析

- append、lowercased、uppercased
- □ https://github.com/apple/swift/blob/master/stdlib/public/core/Substring.swift

## Myganga Optional分析

- map、flatMap、==、??
- <a href="https://github.com/apple/swift/blob/master/stdlib/public/core/Optional.swift">https://github.com/apple/swift/blob/master/stdlib/public/core/Optional.swift</a>

### 小码哥教育 Metadata分析

- 文档: https://github.com/apple/swift/blob/master/docs/ABI/TypeMetadata.rst
- 其他参考
- □ https://github.com/apple/swift/blob/master/include/swift/ABI/Metadata.h
- □ <a href="https://github.com/apple/swift/blob/master/include/swift/ABI/MetadataKind.def">https://github.com/apple/swift/blob/master/include/swift/ABI/MetadataKind.def</a>
- □ https://github.com/apple/swift/blob/master/include/swift/ABI/MetadataValues.h
- □ https://github.com/apple/swift/blob/master/include/swift/Reflection/Records.h

#### 小码哥教育 SEEMYGO 反射

- 反射是编程语言中一项强大的能力,比如Java语言的反射机制
- □ 对于任意一个类型,都能够动态获取这个类的所有属性和方法信息
- □ 对于任意一个实例,都能够动态调用它的任意方法和属性
- Swift的反射机制目前还比较弱,通过 Mirror 类型来提供简单的反射功能

```
struct Person {
   var age: Int = 0
   var name: String = ""
}
```

```
let mirror = Mirror(reflecting: Person(age: 10, name: "Jack"))
// struct
print(mirror.displayStyle!)
// Person
print(mirror.subjectType)
// nil
print(mirror.superclassMirror as Any)
// age 10
// name Jack
for case let (label?, value) in mirror.children {
    print(label, value)
}
```
